MULTIMEDIA

With multimedia we are no longer a passive audience, we can control and interact.

it makes us feel relieved, relaxed, and total comfort. We at fastnet understand how important is that feeling to our customers and this is what motivates our designers while planning and designing your Entertainment & Multimedia solutions. We develop these solutions to complete your comfort feeling and to add a touch of warmth and relaxation to your place. by offering professional entertainment solutions that varies from stand-alone audio system to a complete entertainment solution including dedicated cinema rooms, outdoor and party solutions, TV control solutions, SMATV, IPTV, home theaters.

Telecommunication is now the lifeblood of our society and has helped make the world a global village with about 98 percent of the world under its network coverage ,so Receiving and Placing call it is not the only function that nowadays telecommunication solution is doing, our world is now beyond this function so we at Fastnet IOT, are here to provide you with solutions that put your home and business on this developing track , we provide IP telephony system which beside doing communication services this system can Transmits voice commands over the network and can be connected to video and audio intercom to provide customers the ability to monitor and communicate with their front doors, gates or entryways.

NETWORKING

Today high-performing network is critical.

Whether you have a few devices online or your building is brimming with automation, networking solutions feature the highest quality products all designed for the unique demands of your connected building .we at fastnet IOT provide a fully connecting systems which enable you to control your lighting system , sound system, tv and security systems just by one touch .

SMARTHOMES

While there are many smart products available today, it isn't until these devices work together in orchestration, that you experience the magic of a smart home.

From homes small to large, new and old, delivers power and performance on one system that coordinates the technology in your house into complete, brilliant experiences interactions that fit your lifestyle and are easy for your family to enjoy. With one touch, dim the lights, stream high-resolution music, turn up the heat, lock the doors and arm the security system. Check in on cameras or see who's ringing the doorbell from wherever you are. It's a smarter Living experience that you'll wonder how you ever lived without.

SECURITY

Security system is contained of electronic devices working together with a central control panel to protect against burglars and other potential intruders.

Our security system contained from:

Control Panel: The control panel is the computer that arms And disarms the security systems, communicates with each installed component.

Door and Window Sensors: Door and window sensors are comprised of two parts installed adjacent to each other. One part of the device is installed on the door or window and the other on the door frame or window sill. When a door or window is closed, the two parts of the sensor are joined together, creating a security circuit.

Motion Sensors: These security components, when armed, protect a given space by creating an invisible zone that cannot be breached without sounding an alarm.

Surveillance cameras : With image quality so crucial, our HD CCTV camera systems let you zoom in to capture the small detail – such as sleight of hand theft. If you have analogue cameras already installed in your premises, it's easy to upgrade to HD CCTV without having to replace your entire security system.

Fire alarm : An automatic fire alarm system is designed to detect the unwanted presence of fire by monitoring environmental changes associated with combustion.

We provide fire alarm systems which intended to notify the building occupants to evacuate in the event of a fire or other emergency,

Report the event to an off-premises location in order to

Summon emergency services, and to prepare the structure and associated systems to control the spread of fire. and smoke.
